Genesis Bio Clean™

Revised - May 25, 2020

Surface Clean Overview

Medecide Antimicrobial Coating

Persistent high level protection of environmental surfaces against germ contamination is at its highest demand. Genesis Turf® has partnered with KPD Global for use of Medecide in it's Genesis Bio Clean™ Service. Medecide™, is an innovative disinfection technology that combats the spread of infectious germs of all kinds including bacteria, viruses, yeasts, fungi and spores after one disinfecting

treatment. Studies of its effectiveness over time demonstrate that levels of kill are maintained at a high level (LOG of 4 or higher) across the board after drying. Treated surfaces are safe to touch. Medecide formulations are water-based, and applied with Genesis Bio Clean trained staff using certified equipment and methods. The principal active component in the formulation is an EPA-registered biocidal agent.

Genesis Bio Clean Service with Medecide Results

- Disinfects surfaces and immediately destroys the Covid-19 virus (and all other pathogens) within seconds of application.
- One application can keep treated environments free of coronavirus 28 days
- **The patented molecular structure allows Medecide to adhere to and to actively kill all germs on all all types of surfaces for 28 days at an LOG 4 or higher kill rate.**
- Safe for use around people, pets and food; not caustic when inhaled or when it comes in contact with skin.
- The longevity of its bonding and effectiveness contributes to time and cost savings through fewer applications.
- Deposits long-lasting & powerful antimicrobial activity on treated surfaces
- Remains active for 28 days
- Spray on disinfectant for hard or soft surfaces
- Patented Non-toxic formula safe for people, animals & food surfaces
- Can be used in laundry, stays active on fabric through multiple washes/drying
- Safety Data Sheet, and Component Formulation available upon request.

Not Just Disinfecting, But a Antimicrobial Coating

The Genesis Bio Clean service Disinfects surfaces and immediately destroys the Covid 19 virus (and all other pathogens) within seconds of application. **One application can keep treated environments free of Coronavirus 28 days.** The patented molecular structure allows Medecide to adhere to and to actively kill all germs on all all types of surfaces for 28 days at an LOG 4 or higher kill rate. Safe for use around people, pets, and food; not caustic when inhaled or when it comes in contact with skin.
